

## Patients Shipping and Billing Information

We will ship your patients' packages wherever they may be, whether around the corner or across the country, even next day if necessary.

If your patients need help filing with their insurance company, we are there to help them do so. All we ask is that they provide us with a Drug Reimbursement Form and we will take care of the rest. After the form is submitted, we will mail the patient a copy so that they know it was sent to their insurance company for reimbursement.
